Activation lock removal free

Apple devices have one of the narrowest security systems out there, and you can hardly go wrong with it. An amazing element of your security is iCloud activation lock. What it does is, when you own and set up an iPhone, it connects to a unique cloud ID. That only gives you the privilege of being in control of your data. Even if your iPhone is stolen, the crooks wouldn't be able to use it because it will have your activation lock associated with it. They would need the username and password combination of your Apple ID to access it. iCloud Activation Lock works hand in hand with Find My iPhone, which is another security feature that allows you to locate your missing device. Both features are enabled by default on all iPhones and should be maintained that way. On a side note, if you want to see if Find My iPhone is enabled on your device or not, you can go to: Settings >> YOUR NAME >> iCloud >> Find My iPhone. While iCloud Activation Lock feature is definitely necessary and does a brilliant job, there may be a situation where you might feel a little helpless. An example of this is when you buy a second-hand/used iPhone and don't realize it was locked. In such a situation, you can make use of the tools mentioned below that will help you remove iCloud Activation Lock without any problems.
